PROFESSIONAL EXPERIENCE

Senior Full Stack Engineer | Boffin Coders | Jul 2020 – Aug 2026

- Led development of 30+ production SaaS, enterprise and mobile applications for international clients, working across frontend, backend and deployment.
- Built backend services and REST APIs with Node.js, NestJS and Express.js, including authentication (JWT, OAuth 2.0), PostgreSQL and MongoDB data models, and third-party integrations.
- Developed responsive React.js and Next.js (TypeScript) frontends from Figma designs using Redux, Tailwind CSS and Material UI.
- Built real-time communication features, including in-app chat, with WebSockets and Socket.IO.
- Integrated payment gateways (Stripe, Razorpay, PayPal) and third-party APIs including Twilio voice and SMS, Zoom and Google BigQuery.
- Set up CI/CD pipelines with GitHub Actions and GitLab CI, and deployed applications on AWS (EC2, S3) and GCP with Nginx and PM2.
- Improved application performance through database query optimization and caching.
- Performed code reviews, mentored junior developers and took part in architecture planning.
- Delivered features in Agile sprints with product owners, designers and stakeholders on international projects.
- Used AI-assisted development tools (Cursor, Claude Code, OpenAI Codex) daily to speed up delivery.

Full Stack Developer | Mars WebTech | May 2019 – Jun 2020

- Developed client web applications and business websites using React.js, Node.js and MySQL.
- Built reusable frontend components, backend modules and REST APIs, and customized enterprise solutions for clients.
- Collaborated with senior developers on client projects.

PROJECTS

Direct Stay – Property Booking Platform (Airbnb-style) | Next.js, Node.js, PostgreSQL

- Developed host authentication, host onboarding, and REST APIs for host and guest profiles.
- Implemented property listing and booking flows, search filters, location-based discovery and pickup/drop availability.

NearNex – Local Services Marketplace | Next.js, NestJS, MongoDB, WebSockets

- Built authentication and service-listing flows for a marketplace where users offer and find services (OLX-style, for services instead of goods).
- Implemented real-time chat with WebSockets, search filters and location-based service search.

BoardSync – Monday.com to Google BigQuery Sync | Node.js, React.js, MongoDB, Google BigQuery

- Developed Google BigQuery authentication, board-to-table conversion and data sync workflows for a Monday.com app that syncs board data to BigQuery.

English Learning Platform – Online Course Platform (Udemy-style) | React.js, Node.js, REST APIs, Zoom API, SMS API

- Built teacher and admin panels with book management, course filtering, and teacher and student leave workflows.
- Integrated the Zoom API for online class scheduling and messaging, and an SMS API for notifications.

ISaveLife – Blood Donation Platform | React.js, Node.js, MongoDB

- Developed donor–recipient matching workflows, user dashboards, notifications and admin panel APIs.

EDUCATION

Bachelor of Computer Applications (BCA) | Punjabi University | 2016 – 2019
